DVT44 with RF Reflection-Free glass

Affordable Direct Vent Fireplaces From Atlanta Garage Doors & Fireplaces, LLC

As grand as its name, the Chateau Series features an extraordinary line of clean face direct vent fireplaces with magnificent roaring fires and solid performance. These models are reminiscent of open Rumford-style wood fireplaces, but with the convenience of gas. Until now, only the finest spectacles could eliminate distracting reflections with lens glass which is virtually invisible. CFM Specialty Home Products delivers this kind of Reflection-Free experience with the optional, amazing RF Glass in the Chateau line of fireplaces.

Full Surround Mantels

Nothing completes a Chateau Series fireplace (DVT44, DVT38, & DVT38S2) like this handsome wooden full surround mantel. Available in Majestic Mission Oak Stain, Williamsburg Cherry Stain or primed for paint finish.

This full surround mantel comes with two discrete access doors - one for the gas valve module (top right-hand corner of mantel) and one for the gas shut off valve (in right-hand leg of mantel).
